

# JAZZ EASyS

Adjustable  
push handle

Air  
ventilating  
upholstery

Adjustable seat  
depth and footrest

## Comfortable • Functional • Safe • Simple

JAZZ EASyS, Music to your ears

- **COMFORTABLE** ... From the underseat spring suspension to the air ventilating upholstery, your child will ride in comfort and style.
- **FUNCTIONAL** ... Exceptional positioning includes as standard a fully reclining back, tilt-in-space, height and angle adjustable footrest and ample growth adjustments. Many optional accessories can be added giving your child the best opportunity for independent function.
- **UNRIVALED SAFETY** ... The patented Balanced Safety System (BSS®) moves the seat forward as the back is reclined, keeping your child's weight evenly balanced over the wheels. JAZZ is crash-tested and approved for bus and van transportation with reflective seams on the upholstery!
- **SIMPLE TO USE** ... The lightweight frame can be folded quickly, with or without the seat on it; no tools required. The seat adapter has a click-on system making it a breeze to remove or reverse the seat.

Folding the JAZZ Stroller. . .it's just that EASyS!
