

Nurmi Neo by Otto Bock

The Nurmi Neo is named for one of the best long distance runners of all time, Finnish Gold Medalist, Paavo Nurmi. Winner of twelve Olympic medals, including nine gold, Nurmi was famous for his passion to succeed, his commitment to his sport, and his amazing endurance and flexibility.

The Nurmi Neo by Otto Bock helps kids go the distance. Our new Nurmi Neo walking aid has a strong, but flexible frame that's designed to promote movement and natural gait. It's one of the lightest frames on the market, but at the same time it offers one of the highest load capacities. The height and depth adjustable grip bars, and a wide selection of accessories, allow the Nurmi Neo to grow and be adjusted to a child's needs. The Nurmi Neo assures a high degree of security thanks to its anti-tip bars, reverse-roll wheel locks, and optional swivel wheel locks and friction brakes. In addition, the Nurmi Neo features an optional seat that can be used as needed, and won't fall down as the child moves forward. Kids and parents like it because it's sporty and fun. Therapists like it because of its endless ability for adjustment.

The Nurmi Neo — Freedom of Movement, Power to Achieve.

Otto Bock®

QUALITY FOR LIFE

Nurmi Neo

Nurmi Neo in Detail

- Sporty design available in two fun colors Saturn Blue Metallic and Granny Smith Green
- Available with three different depth and height adjustable grip bars
 - Grip bar with universal grips can be adjusted to reduce the width between grips
 - Extra high grip bar with forearm supports and vertical hand grips is angle adjustable
 - Grip bar with mini grips is ideal for smaller children because it provides a lower grip height and/or shorter width between grips
- Anti-tip bars provide stability to prevent tipping
- Friction brake applies to the rear wheels to slow forward progression/speed during ambulation. Friction can be increased or decreased by adjusting the interior set screws.
- Caster swivel wheel locks can be locked in straight alignment to help control lateral movement during ambulation. Quick release feature allows for quick unlocking as gait development progresses.
- Fold up seat helps build endurance for ambulation over greater distances
- Storage basket allows personal items to be kept within reach
