Big Hug™

A Sensory Therapy, Deep Pressure Positioning Aid

This exceptional Functional Form Therapeutic Aid was ergonomically designed to calm, reorganize and redirect the energy of children and adults living with Autism or who are Cognitively Disabled and would benefit from deep pressure therapy. The Big Hug has been found to be effective because it allows the caregiver to simultaneously apply different amounts of soft, wrap-around pressure to five separate areas of the body. The caregiver or user is then able to release the Big Hug's wraps after the desired amount of individualized sensory needs are obtained.

Features & Benefits of the Big Hug

- Five individual, adjustable body wraps allow for range of pressure to vary across the body
- Lightweight, portable and folds in half for easy storage
- Users are able to release Velcro style hook and loop straps whether hands are outside of Big Hug or are alongside body and wrapped inside
- Includes adjustable waist belt and cushioned shoulder straps for application of downward pressure
- Horseshoe shaped pillow for additional safe, head control for lying in supine position
- Easy to use, clean, adjust and fit properly
- Made with comfortable, institutional quality, water-resistant materials that exceed cal 117 fire codes and are treated with antibacterial and mold retardants

"The innovative approach to helping those who benefit from deep pressure therapy to simultaneously receive maximum sensory results"

Tammy Johnson, Occupational Therapist at James Madison Elementary said, "It's just amazing to see the difference after using the Big Hug."

The Big Hug also works well with other Functional Form Positioning Aids such as the Incline Wedge which allows the user to be at a 15° incline while using the Big Hug.

Our Functional Forms Prone on Forearms package includes the Incline Wedge plus additional positioning aides that allow the user to be in the Prone position while in the Big Hug.

Ask about our special pricing for packages that include the Big Hug and these Functional Forms Positioning Aids!!!

Part #	User Height	Maximum Shoulder Width	Maximum Shoulder Circumference
170 ES	Fits most toddlers 29" to 40"	9"	28"
