

Sleepy Time Headrest Company

Safe

The Sleepy Time Headrest has been dynamically crash tested according to FMVSS 213 (Federal Motor Vehicle Safety Standard 213) to provide the safest possible product for your child.

Comfortable

The Sleepy Time Headrest keeps your child's head and neck in proper alignment to provide an unsurpassed level of comfort while on the go. Parents with special needs children now have a comfortable alternative to the confinement and restraint of a hard collar or forehead strap. Because it is manufactured out of cotton, the headrest is cool and comfortable in any weather.

Support

The Sleepy Time Headrest cradles your child's head while giving just the right amount of support. Unlike the other headrests on the market, the Sleepy Time provides support in all directions not just side to side. When your child begins to sit upright as they travel, the Sleepy Time is the only headrest that will prevent your child's head from constantly falling forward.
