

# The Mighty Able Table

by R.E.A.L. Design Inc

## Once upon a time:

there was a little table who was very sad because all the other tables were so big and he wanted to be like them. What good am I he wondered?

One day a little girl came by. The sad table told her his story and she said, "But you are a sturdy and strong table and you are just the right size for me! You can go very high when I need to stand and do my arts and crafts. You can go very low so, when I am playing down on the floor I can set my toys on you. When I am sitting on a chair I can lift your table top to just the right height to do my school work. I think you are a Mighty-Able Table".

Now the little table was happy and so was the little girl.

# The Mighty Able Table

R.E.A.L. Design introduces our newest product - **The Mighty-Able Table**.

The same design and engineering that makes our Convert-Able Table so popular including, ease of use and adaptability is also incorporated into our newest table. The **The Mighty-Able Table** is adjustable in height and angle which allows it to be used with standard height chairs, floor sitters or other children's adaptive seating. No other table but a REAL Design's table offers such versatility and durability!

## The Mighty Able Table features:

-  easy push button table top height adjustment
-  tilting work surface that adjusts from 0 to 90 degrees with the use of a single lever
-  the sturdy table frame is constructed of colorful powder coated tubular steel for durability (Custom colors are available)
-  the ample size melamine work surface is easily cleanable and scratch resistant
