rabbit[™]

Mobile standing frame for active children
mobility

The new Rabbit is available in 4 sizes and suitable for children/teenagers between 1 and 18 years. The functionality of the Rabbit stays the same. It still provides the opportunity to explore and enjoy new and exciting adventures. The standing position entices the user to actively participate in things around him or her. The mobility of the Rabbit is similar to that experienced by active wheelchair users.

rabbit™

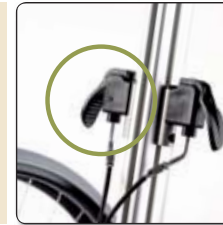

Angle adjustable center bar

The Rabbit has a simple, easy to use and controlled angle adjustment, making it possible to obtain the best standing position.

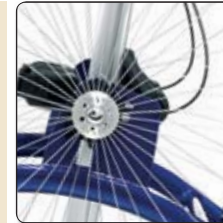

Central brake

User operated brake system which locks the wheels for steady and secure transfer.

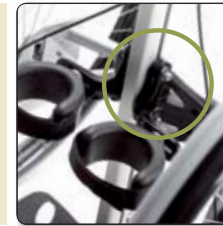

Quick release wheels

The two driving wheels are equipped with quick release for easy mounting. The wheels are available in a variety of sizes for each size Rabbit.

Prepared for accessories

All sizes of Rabbit can be equipped with all sizes of accessories. The Rabbit is designed with slots in the center bar for mounting the accessories.

The standing position enables the child to be an active participant, while stimulating senses and giving the child more independence. The Rabbit is secure and reliable and easy to adjust, meeting the needs of the individual child. It provides children with the opportunity to explore and enjoy new and exciting adventures. An accessible and simple design ensures the user maximum mobility in the standing position.

Positioning the footplate closer to the floor ensures easy placement and positioning of the child. The child is at the same level as their play mates.

The Rabbit comes in four sizes and is suitable for children between the age of 1 to 18 years. Not all children are alike - that is why it is important to use the measuring chart to find the correct size for your child.
