

The MSS Tilt & Recline seating system is designed for children with moderate to severe physical involvement.

The newly designed chair has a hydraulic actuator that activates the tilt-in-space feature. One model now provides the same growth range as our previous two models. The basic model includes all the features below.

MSS Tilt & Recline Seating System

Item #	UOM
MS 3000N	1/bx

- Multi-Axis Headrest - height, depth and angle adjustable. It can be placed off center.
- Seat - depth adjustable.
- Back - height and angle adjustable.
- Harness - adjustable zippered "H" harness for anterior chest support.
- Pelvic Belt - adjustable in length.
- Laterals - height and width adjustable. They assist in stabilizing and aligning trunk and pelvis. Each lateral is individually adjustable to control unwanted weight shifts.
- Armrest - height and angle adjustable.
- Adductors - two sizes are included to facilitate a range of chair widths. The adductors control lower extremity positions and prevent adduction of user's legs.
- Abductor - height and depth adjustable.
- Footrests - height, depth and angle adjustable. They include foot sandals with toe loop.
- Tray - attaches onto armrest and is height adjustable. It provides trunk stabilization and an easy-to-clean surface with a safety lip. It is ideal for school, play and feeding.
- Each footrest is individually adjustable for custom fit.
- Removable and washable fabric covers.
